

Action plan submitted by Fazıl Ahmet Karaca for Kazım Karabekir ilkokulu - 13.01.2023 @ 14:31:17

By submitting your completed Assessment Form to the eSafety Label portal you have taken an important step towards analysing the status of eSafety in your school. Congratulations! Please read through your Action Plan carefully to see what you can do to improve eSafety further in your school. The Action Plan offers useful advice and comments, broken down into 3 key areas: infrastructure, policy and practice.

Infrastructure

Technical security

- › It is very good that all your school devices are virus protected. Make sure you also have included a paragraph on virus protection in both your school policy and your Acceptable Use Policy, and ensure that staff and pupils rigorously apply school guidelines. If you need further information, check out the fact sheet on Protecting your devices against malware at www.esafetylabel.eu/group/community/protecting-your-devices-against-malware.
- › Your school system is protected by a firewall. Ensure that the provision and management of the firewall are regularly reviewed and updated, as and when required.

Pupil and staff access to technology

- › All staff and pupils are allowed to use USB memory sticks in your school. This is good practice, and your Acceptable Use Policy should stipulate that all removable media is checked before use in the school systems. Check the fact sheet on Use of removable devices at www.esafetylabel.eu/group/community/use-of-removable-devices to make sure you cover all security aspects.

Data protection

- › It is good that your school provides training materials on the importance of protecting devices, especially portable ones. Please consider sharing those with others through the in . Also ensure that your materials are regularly reviewed to ensure they are in line with the state of the latest technology.
- › Your new users are given a standard password and are asked to generate their own password on their first access. Passwords offer unique entry points into the school computing system and some basic rules of password security should be rigorously applied. For further information, read the fact sheet on Safe passwords at www.esafetylabel.eu/group/community/safe-passwords. Include these rules in your Acceptable User Agreement and avoid giving new users a standard "first access" password.
- › You have a good policy of keeping your learning and administration environments separate. It is good to ensure that staff training on managing these environments is up to date as you continue to review your policies. Share

your policy with other eSafety Label users by uploading it to your school profile.

Software licensing

- › It is good that you can produce an overview of installed software and their licences in a short time frame with the help of several people. Consider centralising this.
- › It is important to ensure that all new staff are briefed about the effective processes you have for the installation of new software. This will mean that the security of your systems can be maintained and that staff can try out new software applications that will help teaching and learning.

IT Management

- › It is good practice to ensure that the person in charge of the ICT network is fully informed of what software is on school-owned hardware and this should be clearly indicated in the School Policy and the Acceptable Use Policy. The person responsible for the network needs to be able to guarantee conformity with licensing requirements and that new software won't interfere with network operation.
- › There is a mechanism set up in your school that allows any staff member to make a request for new hardware/software - a request that leads to an informed decision within a reasonable amount of time. This is great as this way teacher can benefit from new technologies while still staying inline with school policy.

Policy

Acceptable Use Policy (AUP)

- › It is good practise that in your school teachers and pupils sign the relevant school policies and that it is discussed with pupils beforehand. Consider having regular meetings to discuss them and where non-conformity is dealt with.
- › It is good that you have an Acceptable Use Policy for all members of the school community. Regularly review the AUP to ensure that it is still fit for purpose; to ensure that your AUP is sufficiently comprehensive, take a look at the fact sheet and check list on Acceptable Use Policy at www.esafetylabel.eu/group/community/acceptable-use-policy-aup-.

Reporting and Incident-Handling

- › Your teachers know how to recognise and handle (cyber)bullying. Think about ways to raise awareness also among pupils and parents. Check out the eSafety fact sheet for more information.
- › Are all staff familiar with the procedure for dealing with material that could potentially be illegal? Is there a named person from the school senior leadership team who takes overall responsibility in this type of case? The procedure needs to be clearly communicated to all staff in the School Policy, and to staff and pupils in the Acceptable Use Policy. Remember to report and suspected illegal content to your national INHOPE hotline (www.inhope.org).
- › Check that your School Policy includes all necessary information for teachers about handling issues when pupils

knowingly or even inadvertently access illegal or offensive material online by going to the guidance set out by the teachtoday.de/en website (tinyurl.com/9j86v84). If such incidents arise in your school, make sure you anonymously fill out the eSafety Label Incident handling form (www.esafetylabel.eu/group/teacher/incident-handling) so that other schools can benefit from your experience.

- › Ensure that all staff, including new members of staff, are aware of the guidelines concerning what to do if inappropriate or illegal material is discovered on a school machine. Ensure, too, that the policy is rigorously enforced. A member of the school's senior leadership team should monitor this.

Staff policy

- › Ensure that all staff understand the school's regulations on use of personal mobile devices in the classroom; these should be clearly communicated in the School Policy. Monitor the effectiveness of the policy and ensure that it is adhered to. You can also advise your staff to read the fact sheet Using mobile phones at school (www.esafetylabel.eu/group/community/using-mobile-device-in-schools).

Pupil practice/behaviour School presence online

- › You have a dedicated person to monitor your school's online reputation, and this is good practice. Always be aware of any new sites that may not be immediately apparent through a regular search. Keep up to date with the latest sites and monitor these periodically, as they can be particularly damaging for schools and their pupils and staff if they present a negative viewpoint.
- › Check the fact sheet on Taking and publishing photos and videos at school (www.esafetylabel.eu/group/community/taking-and-publishing-photos-and-videos-at-school) to see that your School Policy covers all areas, then upload this section of your School Policy to your profile page via your [My school area](#) so that other schools can learn from your good practice.
- › Regularly check the content of the school's online presence on social media sites to ensure that there are no inappropriate comments. Set up a process for keeping the site/page up to date, and check the fact sheet on Schools on social networks (www.esafetylabel.eu/group/community/schools-on-social-networks) for further information to make sure that good practice guidelines have been followed. Get feedback from stakeholders about how useful the profile is.

Practice

Management of eSafety

- › It is good that all staff in your school are responsible for eSafety. However, it is good practice to appoint a person who will have overall responsibility for eSafety issues to provide the focus needed. Ideally this should be someone from the senior leadership team. Ensure that this person is involved in the development and regular review of your School Policy. She or he should not only be informed, but should also fill out the Incident handling form whenever an incident arises at www.esafetylabel.eu/group/teacher/incident-handling.
- › It is good that the job description outlines that the member of staff responsible for ICT needs to keep up to date with new technologies. In addition, it would be good to regularly send the ICT responsible to trainings/conferences so (s)he can keep up with new features and risks. Check out the [Better Internet for Kids](#)

[portal](#) to stay up to date with the latest trends in the online world.

eSafety in the curriculum

- › It is excellent that consequences of online actions are discussed with pupils in all grades. Terms and conditions need to be read to fully understand contractual conditions. This can also concern aspects of data privacy. Another important topic is breach of copyright. Please share the materials used through the uploading evidence tool, accessible also via the [My school area](#).
- › Sexting is an issue which affects many young people. Sharing possible consequences and risks with them is important, as is the opportunity for some discussion around the issue. Sexting should be part of a broad and balanced eSafety curriculum.
- › It is good practice that all pupils in all year groups in your school are taught about eSafety. It continues to be important to review regularly the curriculum provision to ensure it meets ever-changing needs. If you have a curriculum review process of this kind, it would be helpful to other schools if you could publish this on your school profile. To upload go to your [My school area](#).

Extra curricular activities

- › How do you organise peer mentoring among pupils on eSafety? Check out the resources of the [ENABLE project](#) and share your ideas in the [forum](#) of the eSafety Label community so that other schools can benefit from your experience to establish a similar approach.
- › It is good to know that you are frequently using the online eSafety resources from your national Safer Internet Centre. Have you found these resources helpful in your school? Please send your feedback on their use and value to info-insafe@eun.org.
- › Consider sharing the information you have about your pupils' online habits with other schools through the eSafety Label community. You could, for example, upload your latest survey findings on pupils' online habits to your school profile via your [My school area](#).

Sources of support

- › Ask parents for feedback on the kind of eSafety support which is being provided for them and consider innovative ways to maximise the number of parents who are benefitting from, and accessing it. See the fact sheet Information for parents at www.esafetymlabel.eu/group/community/information-for-parents to find resources that could be circulated to parents and ideas for parent evenings.

Staff training

- › It should be a real benefit to your pupils that all staff receive regular training on eSafety issues. Continue to gather feedback from staff on the medium- and long-term benefits of the training and consult the eSafety Label portal to see suggestions for training courses at www.esafetymlabel.eu/group/community/suggestions-for-online-training-courses.

for us to know if you are improving eSafety in areas not mentioned in the questionnaire. You can upload evidence of such changes via the [Upload evidence](#) on the [My school area](#) section of the eSafety Portal. Remember, the completion of the Assessment Form is just one part of the Accreditation Process, because the upload of evidence, your exchanges with others via the [Forum](#), and your [reporting of incidents](#) on the template provided are all also taken into account.
